Art Unit: 1711

1. Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The significance of the language, "at one and the same time", is unclear; it is unclear why "one and" is necessary. Furthermore, it is unclear how "desired" further limits order. What determines the desirability of the order? The examiner has considered applicants' response; however, it is unclear why the language, in question, is necessary.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1711

3. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Reiff et al. ('370 or '737) each in view of WO 99/52961.

The primary references disclose the production of blocked isocyanates and their use with water-proofing and oil-proofing fluorocarbon resins as textile treating compositions, wherein the blocked isocyanates are the reaction product of polyisocyanates, including aromatic isocyanates, active hydrogen compounds containing ionic or potential ionic groups, polyoxyalkylene ethers, and blocking agents.

4. Though the primary references disclose several blocking agents, including imidazoles, the reference is silent with respect to the use of pyrazole blocking agents; however, the position is taken that pyrazoles were known blocking agents for self dispersible isocyanates, to be used as textile finishes with fluorocarbon polymers, at the time of invention. Furthermore, it was known at the time of invention that the use of pyrazole blocking agents within polyisocyanate compositions to be used as textile finishes yields finishes having improved oil- and water-repellent properties and improved fastness properties. This position is supported by the teachings of the secondary reference. See pages 2 and 3. This disclosure, in combination with the fact that the disclosed imidazoles of the primary references and pyrazoles are isomers, is considered to render the use of pyrazoles within the primary references *prima facie* obvious. Furthermore, the secondary reference specifically discloses that a preferred polyisocyanate is MDI, which is aromatic. Given the teachings of the secondary reference regarding the benefits of using pyrazole blocking agents, one of ordinary skill in the art would have reasonably expected the use of the

Art Unit: 1711

pyrazoles within the primary references to yield textile finishes having improved repellent and fastness properties.

5. The examiner has considered applicants' arguments; however, the arguments fail to appreciate the teachings of the secondary reference regarding the benefits of using pyrazole blocking agents within polyisocyanate based textile finishes.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
